Professional Summary

Highly skilled Software Engineer Undergraduate specializing in Full-Stack Development (Laravel, MERN Stack) with proven experience in building and deploying mission-critical Enterprise Resource Planning (ERP) modules. Demonstrated aptitude for system reliability, data integrity, and efficiency gains, complemented by expertise in Mobile Development (Kotlin) and Machine Learning (Python/Sentiment Analysis). Seeking a challenging role to leverage skills in scalable application architecture and technical problem-solving.

Work Experience

Apps Technologies (Pvt) Ltd | Software Developer Intern

Jan 2025 - August 2025

- Designed and deployed 3 mission-critical ERP modules (Inventory Report, Requisitions, Finance workflows) utilized by 5+ internal teams using Laravel, Bootstrap 5, and JavaScript.
- Engineered robust backend architecture, including transaction reference codes and auto-generated account structures, improving overall data integrity by an estimated 99.8%.
- Troubleshooted and resolved over 35 critical production bugs across core logistics modules (Stock Issue, Stock Transfer, and POS), optimizing reliability and increasing system uptime by 15%.
- Performed comprehensive QA and regression testing, identifying edge cases and streamlining deployment workflows to enable smooth, low-risk system updates.
- Delivered responsive UIs featuring dynamic dropdowns, pagination, and export functions, streamlining reporting efficiency for 50+ end-users.
- Collaborated cross-functionally with QA teams and stakeholders, producing technical documentation and conducting live demonstrations.

Education

Sri Lanka Institute of Information Technology (SLIIT) 2022 - Present
BSc (Hons) in Information Technology, Specializing in Information Technology (Undergraduate)

ST/ALOYSIUS COLLEGE Rathnapura 2021/2022
G.C.E Advanced Level - Maths Stream

Project Experience

Deep Learning Cancer Data Analysis - CNN, TensorFlow, Keras

- Developed and benchmarked 4 distinct deep learning architectures (DNN, ResNet-DNN, Wide & Deep Network) for breast cancer classification on the Wisconsin Diagnostic Dataset.
- Achieved the clinical goal of zero false negatives (1.00 Malignant Recall) and 98.8% accuracy using the optimized Wide & Deep Network model.

Community Empowerment Hub – MERN Stack, OpenAI API

- Architected and developed a full-stack platform integrating a marketplace and job portal, supporting 3 core user roles (Seller, Buyer, Admin).
- Implemented role-based access control and secure authentication using JWT, ensuring protected data access for all users.
- Integrated the OpenAI API to provide specialized, AI-powered tools, enhancing user interaction and platform utility.

Ceylon Buddy – Tour Guide Web Application

- Designed and developed a fully responsive tour guide web platform for a client, helping travellers explore Sri Lankan destinations and attractions.
- Built a scalable full-stack architecture ensuring smooth performance, responsive UI/UX, and easy future maintenance.
- Deployed and hosted the website live at ceylonbuddytour.com, ensuring scalability, security, and optimal performance.

Tourist Management System – MERN Stack

- Developed a full-stack web application for managing tourism services (booking, guides, travel packages), facilitating CRUD operations for users and administrators.
- Engineered secure authentication and authorization protocols to manage customer and administrative data effectively.

Review Analysis Project – Python (Jupyter Notebook)

- Built a sentiment analysis pipeline by preprocessing a large dataset of customer reviews (10,000+ entries) using CountVectorizer and TF-IDF.
- Trained and evaluated machine learning models (Logistic Regression, Naive Bayes) to classify review sentiments, achieving an average classification accuracy of 88%.

Library Management System – React.js Web Application

- Built a modern, streamlined React-based interface, simplifying collection browsing and member registration.
- Implemented administrative features for efficient management of books and user access.

Smart Note MAD App – Kotlin Mobile Application

- Developed a mobile note-taking application using Kotlin, focusing on simplicity and rapid note management, demonstrating proficiency in Android app structure.

Hotel Reservation Website – PHP, Java, MySQL

- Engineered a dynamic hotel booking platform featuring robust search, browse, and reservation workflows.
- Designed a user-friendly UI utilizing PHP for backend logic and MySQL for secure, reliable transaction management.

Technical Skills

- Programming Languages: PHP, Java, JavaScript, Python, Kotlin, SQL, HTML
- Web Frameworks & Libraries: Laravel, MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS, Bootstrap 5
- Databases & Data Management: MySQL, MongoDB, Supabase, Data Integrity, CRUD Operations
- Tools & Version Control:Git/GitHub, Visual Studio, Postman, Notion, Jupyter Notebook
- Specialized Domains: ERP Systems Development, RESTful APIs, UI/UX Design, Machine Learning (ML), Sentiment Analysis, Full-Stack Web Development
